

The information provided below is your guide for choosing the right **McNICHOLS®** Decking & Flooring product for your project. Please specify:

APPLICATION

Consider Decking and Flooring applications/uses and physical requirements for your interior or exterior application. Loading, span, and support needs as well as traffic requirements such as pedestrian or hand cart, etc. are important considerations. All of our Decking and Flooring products comply with the Americans with Disabilities Act (ADA) when installed to written standards. We invite you to browse Decking and Flooring applications in our Product and Application Gallery.

CONSTRUCTION TYPE

Choose from our inventory of Overlapping Decking, Extruded Interlocking Flooring, Interlocking Plank Flooring, Fiberglass Flooring, and Metal Flooring construction types.

SERIES TYPE & NAME

Specify the Decking or Flooring series type and name for your project. This includes the construction type and trade name of the product (e.g. TRACTION TREAD™ Metal Flooring). All items comply with the Americans with Disabilities Act (ADA) standard and have this language indicated in the item's description and specifications.

PRIMARY MATERIAL / PRODUCT FINISH

Select the primary material type including Aluminum, Carbon Steel, Fiberglass, and Stainless Steel. Metal inventory is typically mill finish unless otherwise specified. We provide more information on Primary Material Types and Product Finishes in the links provided in the Overview section on the Decking & Flooring Resources landing page.

RESIN & TYPE

If you are selecting a product with Fiberglass as the primary material, choose the resin and type for your application (e.g. SPF Polyester Resin). We provide more information on resins, types, and descriptions in the link provided in the Charts section on the Decking & Flooring Resources landing page.

ALLOY, GRADE, OR TYPE

Choose a secondary material characteristic that applies to your application. A specific material alloy, grade, or type can be an important consideration in your product selection. Factors like temperature, corrosion-resistance, and environmental surroundings can be important variables to consider prior to placing your order.

COLOR

If your product selection is a Fiberglass Decking or Flooring item, choose the preferred color for your application.

GAUGE / THICKNESS

Choose the material gauge number or thickness in inches for your Decking or Flooring product selection. Extruded products do not have an actual gauge due to the manufacturing process. These items are specified as an extrusion.

SURFACE PROFILE / PRODUCT HEIGHT

Choose a surface profile for your application. A surface profile includes the type of surface (e.g. Solid, Vented, etc.) or the type of opening (e.g. Button-Top, etc.) and the width of the product measured in inches (e.g. Solid (24" Width), Button-Top (36" Width), etc.). Additionally, some items also require a product height selection.

PERCENT OPEN AREA

Identify the percentage of open area (if applicable) desired in your Decking or Flooring product selection.

PRODUCT SIZE, FORM, & QUANTITY

Depending on your product selection, determine the number of Sheets, Planks, or Plates including cut-to-size pieces for your project.

SPECIAL REQUIREMENTS

Specify any requirements such as fabrication, non-standard tolerances, etc.

ACCESSORIES

If your product selection is Extruded Interlocking Flooring, please specify the number of Bar Interlocks required for your application.
